## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. An initiated copy of the information disclosure statement (IDS) submitted on 8/23/2006 is attached herewith.

### ***Specification***

2. The application has not been checked to the extent necessary to determine the presence of all possible typographical and grammatical errors. However, Applicant's cooperation is requested in correcting any errors of which he/she may become aware in the application.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 11-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Although the preamble states, "An article comprising: a machine accessible medium..." it appears that the instructions are being claimed (i.e., a program).

The claims are drawn to a computer program per se. A computer program per se is abstract instructions. Therefore, a computer program is not a physical thing (or product) nor a process as they are not "acts" being performed. As such, these claims are not directed to one of the statutory categories of invention (See MPEP 2106.01), but are directed to nonstatutory functional descriptive material.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 11, and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang (US 6,573,847, cited by applicants, hereinafter referred to as Wang).

Regarding claims 1, 11, and 21, Wang discloses (Figs. 1-5) a system (Huffman decoder 5 of Fig. 1; col. 2, line 8) for decoding variable length codes in a bit stream (Figs. 2-3), comprising:

- creating a set of data structures (decoding tables of Figs. 3b and 5);
- selecting an active data structure (e.g., the compressed input data, 101001000010..., of Fig. 5);
- retrieving a bit set size associated with the active data structure (e.g., ...3 bits, 4 bits..., of Figs. 1 and 5);
- reading a number of bits (101 (i.e., 3 bits), 1010 (i.e., 4 bits) ...of Fig. 5) equal to the bit set size from the bit stream; and
- obtaining, from the active data structure (i.e., the compressed input data of Fig. 1 or 5), in accordance with an actual value of the bits read from the bit stream (101, 1010,...), a decoded value (Figs. 2-3), actual code length (length (bits)), reference to

another data structure (among the decoding tables shown in Figs. 2-3), and validity indicator associated with a variable length code (col. 2, lines 8-43).

***Allowable Subject Matter***

5. Claims 2-10 and 22-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the references of record neither reveal nor render obvious the recited limitations including, among other things, repeating the recited steps of claim 1 or 21 until the decoded value is indicated to be valid.

***Prior Art***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (notes: references cited on PTO-892 Form attached herewith).

***Contact Information***
